

Junior Software Developer

FRESHER OPPORTUNITY | EDVYAN PRODUCT DEVELOPMENT

COMPANY	EXPERIENCE	EMPLOYMENT	LOCATION
Limora Technologies	Fresher	Full-time	Bengaluru / Hybrid

About the Role

We are looking for a recent graduate who wants to begin a career in software development. The selected candidate will work with our team on Edvyan, a modern cloud-based product. You will receive guidance while learning to build features, fix issues, test applications and contribute to real projects.

Key Responsibilities

- Assist in developing web application features.
- Write simple, clean and maintainable code.
- Support frontend and backend development.
- Identify and fix basic software issues.
- Test features before release.
- Work with databases and APIs.
- Participate in discussions and code reviews.
- Learn development best practices.
- Maintain basic documentation.

What We Offer

- Work on a real software product.
- Guidance and technical mentorship.
- Exposure to frontend, backend, databases and cloud.
- Practical experience with modern tools.
- Opportunity to learn and grow with the company.

Skills Required

- Basic knowledge of JavaScript, HTML and CSS.
- Basic understanding of React or Node.js.
- Basic knowledge of SQL and databases.
- Familiarity with Git is preferred.
- Good logical and problem-solving skills.
- Willingness to learn new technologies.
- Good communication and teamwork.

Educational Qualification

B.E., B.Tech, BCA, MCA, B.Sc. Computer Science or a related qualification. Students graduating in 2025 or 2026 may apply.

Good to Have

- Academic or personal web-development projects.
- Internship or coding-club experience.
- A GitHub profile or project portfolio.
- Basic awareness of cloud computing or AI.

Candidates are not expected to know every technology. We value fundamentals, learning ability and a positive attitude.

How to Apply

Please send your resume along with your GitHub profile, portfolio, or details of any academic projects you have completed.

Build. Learn. Grow with Limora Technologies.
